

## Portfolio Scoring

Identify risks and opportunities within your portfolio

**Tie your entire risk analysis process together from the front-end inquiry to the back-end account review with Portfolio Scoring from Experian.**

### Portfolio management

When you choose Experian to help improve portfolio management through Portfolio Scoring, your portfolio is enhanced with current and accurate credit information, business demographics, and legal and public information. You may also choose to receive risk assessment scores from Experian's suite of Intelliscore models, Vista or a custom model. When you enhance your file with Portfolio Scoring information at regular intervals, you acquire the ability to look at the most up-to-date information on your portfolio, to view changes over time. This information will help you make incisive portfolio management decisions.

Portfolio Scoring provides a wealth of credit information for each account scored. There are up to 14 data elements provided including:

- Current risk score and percentile
- Average days beyond terms
- Current trade balance
- Number of legal items and balance listed for that account
- Aging of the account's balance with your company
- Years in business
- SIC code

Portfolio Scoring is provided via tape, diskette or e-mail. Information can viewed and analyzed using Experian's Account Advisor software or your own internal viewing and analysis system.

To find out more about Portfolio  
Scoring, contact your local Experian  
sales representative or call
